brewmaxx express

Process control solution for small up to mid-size plants

One of the leading process control systems for the brewing industry is now available as a compact entry-level solution. This package consists of pre-configured automation classes, step sequences, order list and recipe management. The brewmaxx express license is available for up to two clients and two programmable logic controllers (PLCs) and is, therefore, ideally suited for automating smaller plant areas, for example a brewhouse.

Manufacturers as well as machine and plant suppliers can utilize brewmaxx express for applications ranging from production data acquisition (PDA) through to full process control. It is an optimized solution for smaller plant areas like utilities, water treatment, filtration and CO² plant or suitable for smaller brewhouses.

Benefits of brewmaxx express:

- Easy handling and operation – pre-configured brewmaxx process control system
- Two full clients and PLCs – for small up to mid-size plants
- Extensive automation classes – matches the scope of the brewmaxx full version
- Minimal hardware requirements – serverless process control system
- Multi-language support – for english, spanish, german, french, russian and portuguese
- Scalability of brewmaxx – reusability of engineering makes expansion to full system easy
- Discounted licence fees for the brewmaxx Visu-Recorder express – recording and output of process visualisations
